

# Book Recommender Systems

*"If you don't like to read, you haven't found the right book." – J.K. Rowling*

# Where to begin?

<https://www.alamy.com/stock-photo-the-old-bookstore-310869772.html>

[https://www.123rf.com/photo\\_29271029\\_3d-rendering-of-thinking-frustrated-man-with-red-question-mark-3d-white-people-man-character.html](https://www.123rf.com/photo_29271029_3d-rendering-of-thinking-frustrated-man-with-red-question-mark-3d-white-people-man-character.html)

# Reading books?

## **Available books globally**

> 130 million books (2010)

## **Estimated books a person reads per year**

12-120 books

## **Number of books published in a year**

2.2 million books

# Process of selecting a book

- Social media
- Online browsing
- Book referrals

## 10 Best Book Recommendation Sites You Need To Know

Looking for a great summer read? Want to read more on a topic you're interested in or see what's new or trending in the book world? There are plenty of places to turn for book recommendations on the internet. Most are simple and free and best of all, they'll help prevent that feeling of reader's remorse, when you get home from the bookstore or library, start reading and realize that you've just wasted your time and possibly your [hard earned money](#) on a lousy book in which you have no interest in reading.

## 5 summer books and other things to do at home

Whether you're looking for a distraction or just spending a lot more time at home, you can't beat reading a book.

By Bill Gates | May 18, 2020 • 6 minute read

# Problem Statement

Readers faced with vast availability of book choices, and it takes huge amount of time, effort and energy to select a suitable book.

As a data scientist in the online bookstore, we aim to build a book recommendation system in our online bookstore website to help readers save up time to search for the books based on their preference.

The recommender system's success will be evaluated based on the root mean square error (RMSE) between the actual and the predicted rating.

# Overview

**Data Collection  
and cleaning**

**Recommender  
System**

**Exploratory Data  
Analysis**

**Conclusion and  
Recommendation**

# Datasets

(Source: UCSD Book Graph)

## Metadata of books

- 6 datasets  
(books, best book edition, genre, author, book series, book id map)
- 2.3 million books
- 829 thousand authors
- 10 genres

## User-book interactions

- 228 million interactions
- 876 thousand users
- 2.36 million books
- Ratings (1 to 5)

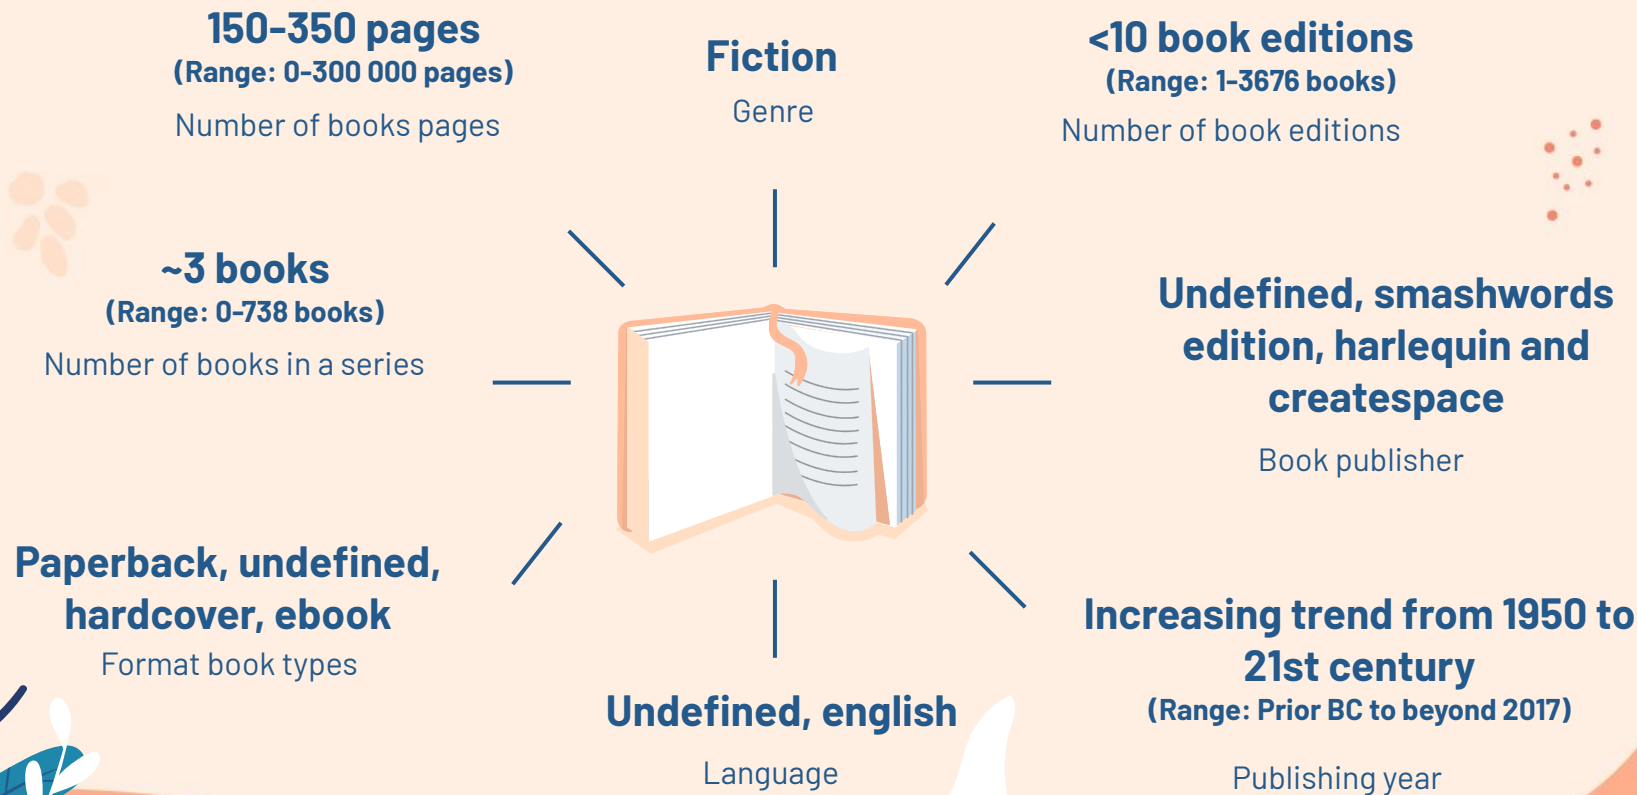

# Exploratory Data Analysis

# Majority of the Books Characteristics in the Dataset

# User-book Interactions in the Dataset

**Majority of books  
read and rated are not  
reviewed**

**Average rating: ~4.0  
(Range: 1.0-5.0)**

**Majority of the users  
rated < 150 books  
(Range: 0-17000 books)**

**Majority of the books rated  
< 20 users  
(Range: 1-307,000 users)**

# Challenges

## Memory Error!

Computational Limitation

Threshold on the user-book interactions were set for

- Ratings of a book required
- Number of books rated by a user

Acquire a subset fraction of the full dataset for further analysis.

# Recommender System

- Popularity-based
- Content-based

**Non-personalized  
Recommendation**

## Collaborative Filtering

- User-based
- Item-based

**Personalized  
Recommendation**

## Model-based System

- Non-negative Matrix Factorization
- Singular Value Decomposition (SVD)
- SVD ++

**Personalized  
Recommendation**

# 01

## Recommender System

### Non-personalized Recommendation

- Popularity-based
- Content-based

# Popularity-based Recommender System

## Top 10 recommended books based on popularity-based recommender system

1  
J.K. Rowling  
Harry Potter and the Deathly Hallows

2  
J.K. Rowling  
Harry Potter and the Prisoner of Azkaban

3  
Sarah J. Maas  
A Court of Mist and Fury

4  
J.K. Rowling  
Complete Harry Potter Boxed Set

5  
J.K. Rowling  
Harry Potter and the Half-Blood Prince

6  
J.K. Rowling  
Harry Potter and the Goblet of Fire

7  
J.K. Rowling  
Harry Potter and the Philosopher's Stone

8  
Cassandra Clare  
Clockwork Princess

9  
J.K. Rowling  
Harry Potter and the Order of the Phoenix

10  
George R.R. Martin  
A Storm of Swords

# Content-based Recommender System

Top 10 recommended books based on content-based recommender system  
for J.K. Rowling - Harry Potter and the Deathly Hallows

1  
J.K. Rowling  
Harry Potter and the Half-Blood Prince

2  
Philip Pullman  
Northern Lights

3  
J.K. Rowling  
Complete Harry Potter Boxed Set

4  
Philip Pullman  
The Amber Spyglass

5  
J.K. Rowling  
Harry Potter and the Prisoner of Azkaban

6  
J.K. Rowling  
Harry Potter and the Chamber of Secrets

7  
China Mieville  
Un Lun Dun

8  
J.K. Rowling  
Harry Potter and the Philosopher's Stone

9  
Brandon Sanderson  
Alcatraz Versus the Scrivener's Bones

10  
Eoin Colfer  
The Time Paradox

# 02

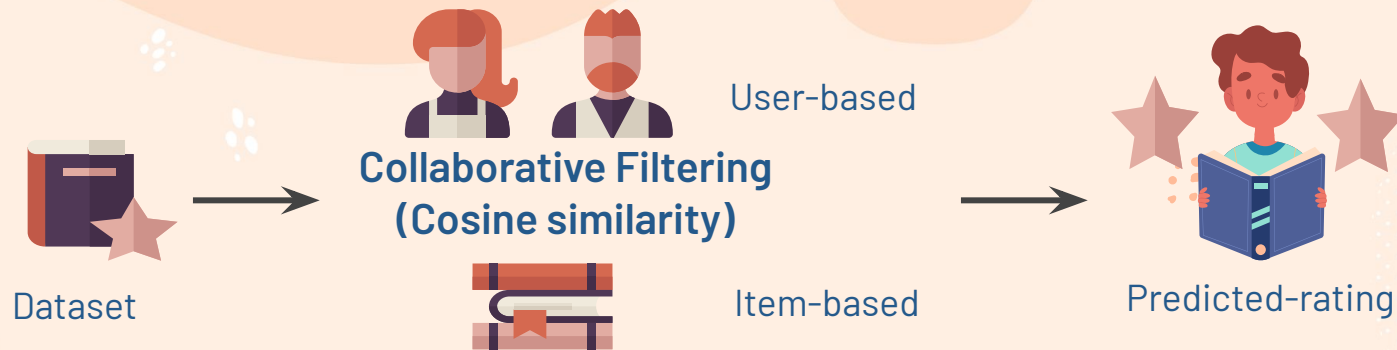

## Recommender System

### Personalized Recommendation

- Collaborative Filtering
- Model-based Systems

# Collaborative Filtering Recommender System

	RMSE	Coverage
Null (Random)	1.9265	100.0%
User-based	1.2720	7.0%
Item-based	1.2663	8.4%

# K-means-Collaborative Filtering Recommender System

	RMSE	Coverage
Null (Random)	1.9265	100.0%
K-means User-based	1.0886	55.0%
K-means Item-based	1.0454	58.4%

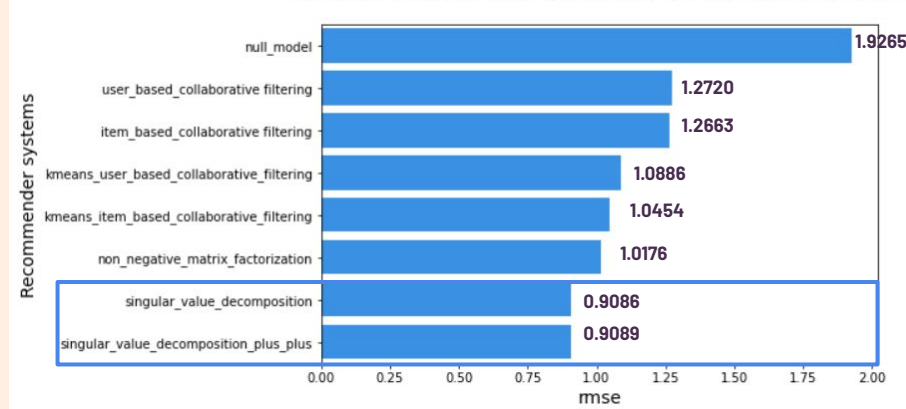

# Model-based Recommender System

	RMSE	Coverage
Null (Random)	1.9265	100.0%
Non-negative Matrix Factorization	1.0178	100.0%
Singular Value Decomposition	0.9086	100.0%
Singular Value Decomposition ++	0.9089	100.0%

# Evaluation

RMSE of test set with different recommender systems

Coverage of test set with different recommender systems

Evaluation: Root Mean Square Error (RMSE)  
Chosen Model: Singular Value Decomposition

# Conclusion & Recommendations

## Exploratory Data Analysis

- Discovered majority of the books characteristics in the dataset
- The user book interactions illustrates the long tail scenario

## Computational Limitation

- Applied threshold and obtained a subset fraction of the dataset

## Non-personalized Recommendation

- Popularity-based
- Content-based

## Personalized recommendation

- Collaborative filtering
- Model-based

## Selected Model

- Singular value decomposition algorithm (Lowest RMSE)
- Improvement of 53% from the null model

## Recommend Books

- Predict ratings more accurately
- Enhanced reader's experience

# Future Work

- Explore more algorithms:
  - Further improve the RMSE score.
  - Handle greater user-book-interactions with good scalability and faster processing speed.
- Implicit data includes user purchased history and more details on the users such age, geographical location may also be explored to provide better readers' experience.

# Thank you!

*"This is one of the things I love about reading.  
Each book opens up new avenues of knowledge  
to explore"*

*– Bill Gates*

# Thanks!
